PRODUCT FEATURES

BUILT TO ENDURE

Premium 1.2mm thick, 304 Grade Stainless Steel creates a surface highly resistant to stains, rust and corrosion.

SOUND ABSORPTION

Noise suppression pads are applied to all external areas of the sink to dampen water impact noise during use.

THOUGHTFULLY DESIGNED

A rear waste results in less pipe intrusion into the cupboards underneath allowing for more storage space, while a 10mm corner radius and folded drainage points limit build up in the sink to ensure easy cleaning.
